Front Basket
Instruction Manual

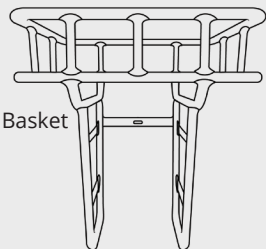

Pieces & Tools:

Hex Key

Long Bolt

Basket

Strap

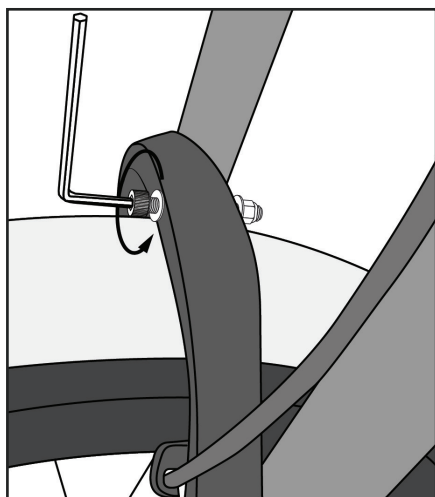

2x Washers

2x Split Rings

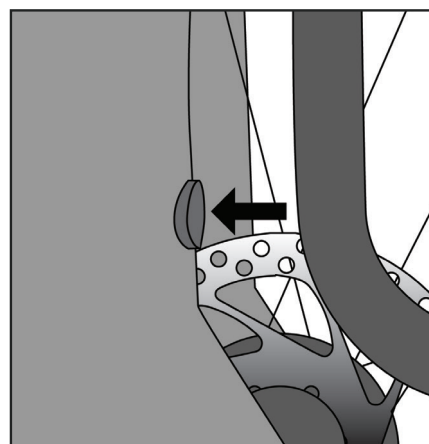

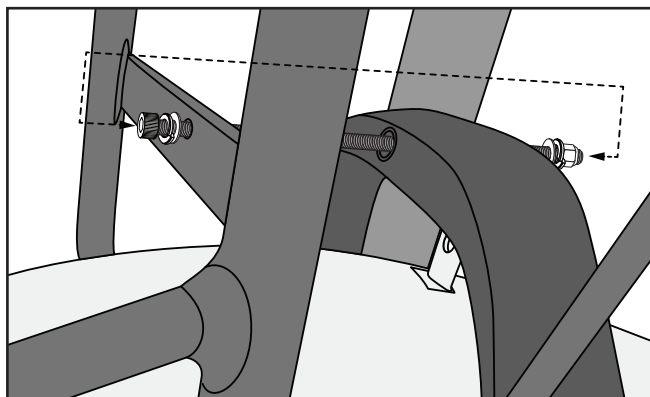

Locking Nut

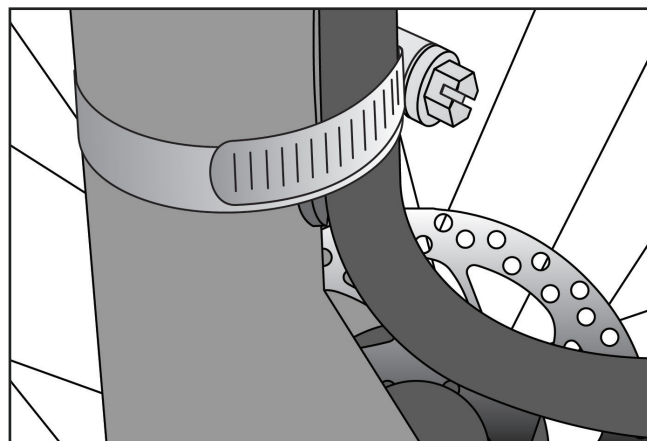

Step 1: Remove the front fender bolt with a wrench.

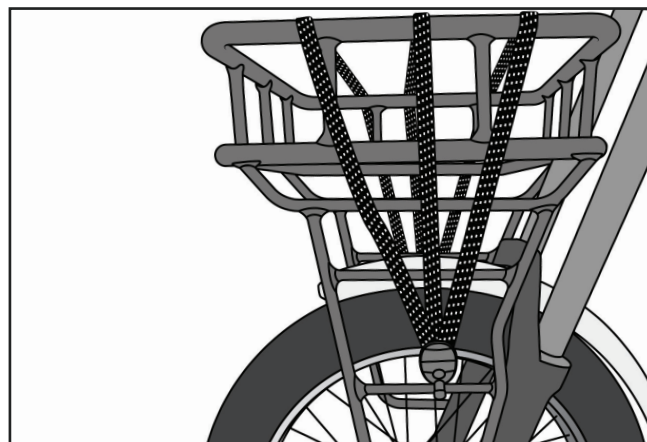

Step 2: Replace the front fender by inserting the the long bolt, split ring and washer through the basket and fender. Then insert a washer, split ring and the locking bolt, tighten but not all the way.

Step 3: Apply 2 felt pads to the front fork at the points of contact with the basket.

Step 4: Put clamp around basket and front fork and tighten. Apply to the right and left side. Make sure everything is fully tightened before riding.

Step 5: Attach strap over the top of basket
