Subject: Trusscore Price Increase Notice Effective July 24, 2026

Over recent months, the cost of resin and additives used in Trusscore products has continued to rise, and freight costs have increased alongside them. Trusscore has worked to absorb these increases wherever possible, but given their sustained nature, it is no longer able to do so without making an adjustment.

Based on these factors, Trusscore has announced a price increase of 7.9%, effective July 24, 2026.

Warehouse orders placed before this effective date and with a ship date prior to July 31, 2026 will be billed at the price in effect at the time of the order. Updated price lists will be provided before July 24, 2026 to reflect this increase.

Trusscore continues to work on your behalf to prioritize product availability and limit the impact of pricing pressures. Your continued support and partnership are appreciated, and we remain committed to providing the pricing guidance you need to manage and grow your business.

Thank you for your continued partnership and support.
