Subject: Supply Surcharge on Select U.S.-Sourced Expansion Joint Products

Dear Valued Customer,

Recent trade measures affecting imports of certain steel and aluminum products from the United States have resulted in significant additional costs on selected products within our Expansion Control Systems portfolio. Despite ongoing efforts to mitigate these impacts through supply chain optimization, strategic sourcing initiatives, and operational efficiencies, these costs cannot be fully absorbed by Sika Canada.

To help offset these additional costs, **a Supply Surcharge of 15 % will be applied to applicable steel and aluminum expansion joint products imported from the United States, effective October 1, 2026.**

The surcharge will be applied **on a per-line-item basis** and will appear as a separate item on customer invoices.

Application Rules

Please note the following:

- Existing orders on record prior to **October 1, 2026**, will not be subject to this specific Supply Surcharge
- All new orders received on or after **October 1, 2026**, will be subject to a 15 % Supply Surcharge on applicable products.

Affected Products

The surcharge applies only to eligible steel and aluminum expansion joint products imported from the United States. Your Sika Canada Expansion Control Systems (ECS) sales representative can provide additional information regarding specific product applicability.

Sika will continue to closely monitor the evolving trade environment and will regularly reassess this measure as market conditions and tariff regulations change. Should these conditions change, we will evaluate appropriate adjustments to this surcharge.

Sika Canada Inc.
601, avenue Delmar - Pointe-Claire (QC) H9R 4A9
